Dear Executive Director's Office,

I am a concern participant in Case-NO. 505. I would like more information on the cellular radio telecommunication service. The information needs to answer question like are there any health hazards such as radiation given off when the server is in use? Also will the server interfere with the satellite signal provide by prime star? I would really appreciate any other information concerning problems with the cellular telecommunication server that have caused problems in pervious locations.

Sincerely,

*John David Rhea Jr.*
